Intelligence

Swift and Intelligent Service

Servo is a powerful business management software that enables businesses to connect and manage all aspects of their operations from procurement through stock to sales and provide real-time reports to owners and managers to avoid losses, optimize services and grow!

Connect Everyone

Servo provides interface for all various staff in the company to execute their tasks with absolute ease, and report directly to management on the state of all operations.

- Waiters/Service
- Cashiers
- Execution Staff (Bar, Kitchen, Ice Cream, etc...)
- General Managers
- Accountants
- Procurement/Store Managers
- Department Managers (Kitchen, Bar, etc...)
- Owners

360 Operations:

Servo routes orders automatically from waiters to the relevant department for excution (food goes to kitchen, drinks to a specific bar, pizza to a pizzeria, etc...) where execution staff indicate the state of preparation and automatically signals waiters when it is time for delivery. Managers supervise all this activity to ensure a smooth chain, whilst all stock movement is documented at the sametime!

Advanced Business Setup:

SERVO is the only system that can accomodate simple or multi-service business setups and thus provide powerful features enabling a highly customised business configuration.

- Multiple Service Points (Lounge, VIP, Night Club, etc...) each with their separate product prices, sending orders to specific execution locations. [e.g. in the Lounge, drinks orders get sent to the Main Bar, but Food gets sent to the central Kitchen, whereas in the VIP, drink orders get sent to the Upstairs Bar and Food orders to the VIP Kitchen for execution]
- Multiple Execution Points (Kitchen, Bar, Grill, Cocktail Bar, etc...)
- Multiple Stock and Warehouse
